76-A. TREE PAINT—"43 For the Tree":

This is designed primarily for use in painting stubs and surfaces after pruning, or for painting cavities before filling. It is used very successfully by many tree surgeons and landscape gardeners. A can of it should be in the kit of every home owner who uses pruning saws and shears. It is most healing in its effect. Comes in either PLASTIC or LIQUID form.

LIQUID FORM is a heavy liquid that forms an air tight coating, and should be applied on all pruned surfaces where the limb is ½-inch in diameter or larger. The medicinal oils penetrate into all parts of the cut or wound. The acids and disinfectant odors will drive away worms.
